

FREE FLOAT STEAM TRAP

MODEL SS1 STAINLESS STEEL

FREE FLOAT STEAM TRAPS WITH THERMOSTATIC AIR VENTING

Features

Inline repairable stainless steel steam trap for steam mains, tracer lines and small process applications.

1. Self modulating free float provides continuous, smooth, low velocity condensate discharge as process loads vary.
2. Constant water seal and unique three-point seating ensure perfect steam-tight seal, even under no-load conditions.
3. Trap incorporates thermostatic air vent for fast start-up.
4. Built-in screen with large surface area holds back impurities.
5. Only one moving part, the free float, eliminates valve wear and provides long service life.
6. Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.

Discharge Capacity

1. Line numbers within the graph refer to orifice numbers.
2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
3. Capacities are based on continuous discharge of condensate 6°C below saturated steam temperature.
4. Recommended safety factor: at least 1.5.

DO NOT use traps under conditions that exceed maximum differential pressure, as condensate backup will occur!
